NV-RAM	Option
Cache Memory	128 KB
HDD	2.5" IDE (option), Max. 2 drives
FDD	External FDD (option)
LAN	10BASE-T/100BASE-TX
PCMCIA	Type II x 1 (option)
MCR	Option (track 1, 2 or track 1, 2, 3 or JIS I/II)
Operator Display	12.1" color TFT (active) with touch panel
Customer Display	2 x 20 VFD (option), 12.1" TFT (option)
Interface	RS-232C x 3, Parallel x 1, PC Keyboard, Mouse, Dual screen and sound, USB x 2, Drawer x 2
Power	Autosensing
Dimensions	295 (W) x 350 (D) x 129-343 (H) mm
Weight	8 Kg (excluding options)
Operating temperature	5-35° C

Powerful Performance

At the heart of the ST-60-C5 is a specially-designed motherboard, which comes as standard with the latest Intel Celeron™ processor, an upgradable 64 MB RAM and a high-speed LAN interface.

The ST-60-C5 has been thoroughly tested in severe environments and extreme conditions such as repetitive touching, water spills, screen tilt tests, etc. It has been specifically designed to cater for many demanding applications, including QSR, fine dining, speciality shops...

The super-bright TFT screen can be viewed from almost any angle, which, with the screen tilt angle of 0-90° and smooth touch functionality with optional tone makes the ST-60-C5 one of the easiest-to-use POS terminals on the market.

Multimedia

The ST-60-C5 its dual screen interface and rich sound capabilities make it ideal for creative retailers who want to benefit from the latest technology advances to increase their sales. In-store promotions, advertising, videos and loyalty scheme communications are all now possible during the POS transaction.

Open and flexible

The ST-60-C5 supports the whole range of Microsoft Windows operating systems, including Windows®98, Windows NT®, Windows®2000 and Windows®XP. As a key member of the OLE POS Committee, TOSHIBA TEC continuously promotes the standardisation of drivers for peripheral devices for the retail market. This standardisation in turn provides the versatility and convenience of application development for VAR and software developers allowing the flexibility to use peripherals from different manufacturers in one system.
