TOSHIBA
Leading Innovation

Direct from the Toshiba experts, an energy-saving yet powerful POS engine, specifically designed to reduce environmental impact. The innovative WILLPOS B20, with its quick and effortless 'slide-out' servicing, is the smart choice for today's eco-friendly retailers.

WILLPOS B20

APPLICATIONS

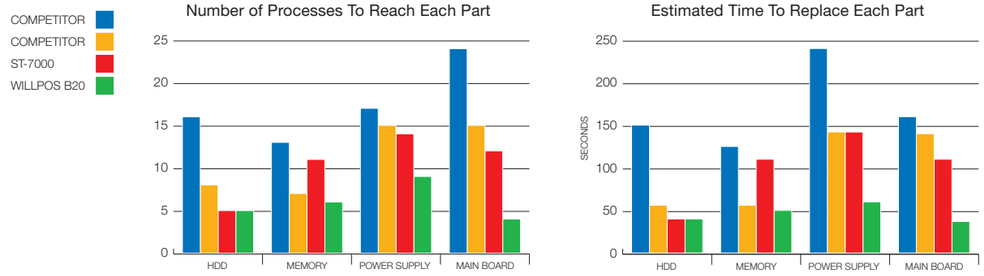
As an energy efficient yet high performance modular POS solution, the WILLPOS B20 offers a powerful advantage across a variety of highly competitive retail markets.

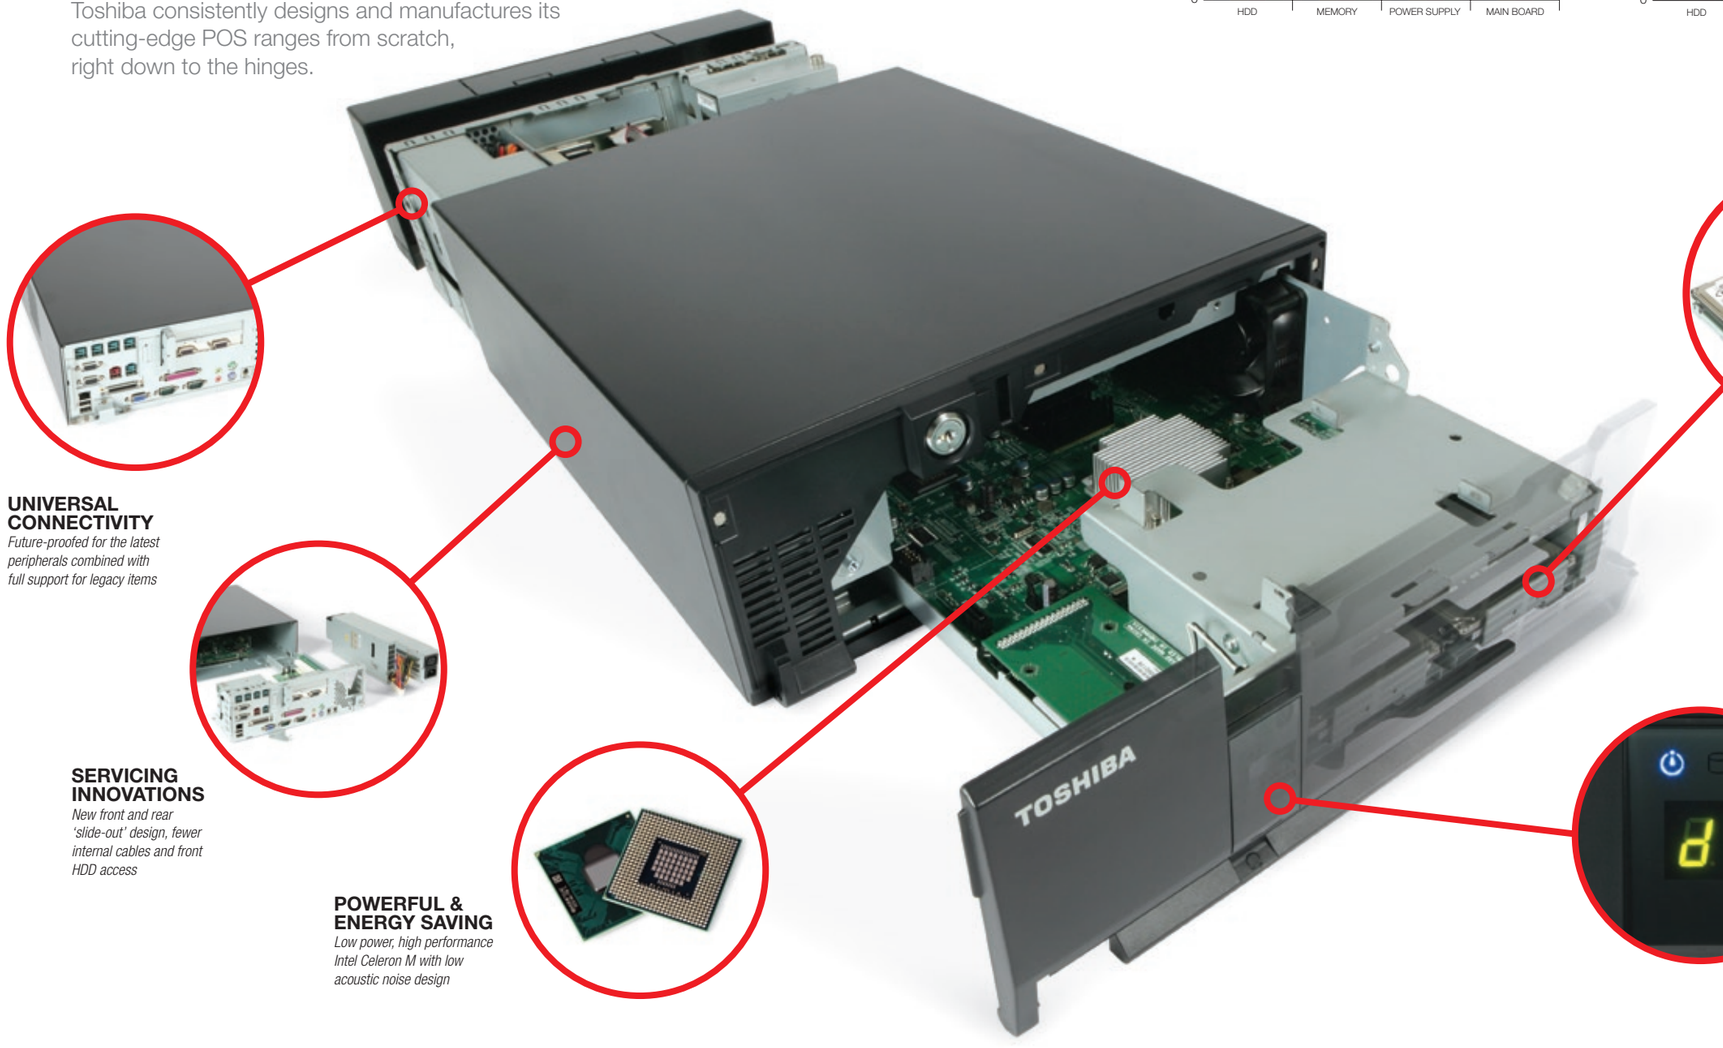
- **Supermarkets**
- **Hypermarkets**
- **Superstores**
- **Department stores**
- **Warehouse stores**
- **Wholesalers**
- **Service stations**

‘SLIDE-OUT’ SERVICEABILITY

We had a vision of the future and made it real. Enjoy.

With a wealth of long-term experience and knowledge, Toshiba consistently designs and manufactures its cutting-edge POS ranges from scratch, right down to the hinges.





UNIVERSAL CONNECTIVITY
Future-proofed for the latest peripherals combined with full support for legacy items

SERVICING INNOVATIONS
New front and rear ‘slide-out’ design, fewer internal cables and front HDD access

POWERFUL & ENERGY SAVING
Low power, high performance Intel Celeron M with low acoustic noise design

SYSTEM SECURITY & MONITORING
RAID mirroring (Windows® only) and SNMP functionality

EASY DIAGNOSTICS
Fully lit, clear and concise 7 segment front panel diagnostics display

EFFORTLESS MAINTENANCE

With front and back tool-less ‘slide-out’ components and fewer internal cables, servicing the WILLPOS B20 is quick and effortless, taking downtime to an absolute minimum and further reducing the total cost of ownership. It is also uniquely possible to remove the hard disk, motherboard and power supply without first detaching any peripherals.

Toshiba benchmark tests confirm that WILLPOS B20 servicing times are considerably quicker than its predecessor or its competitors. For example, to reach the main board, another modular POS requires 24 actions, yet the WILLPOS B20 needs just 4, and the total time taken to replace the main board in the WILLPOS B20 is at least 3 times faster than that of its two main competitors.

ENHANCED FUNCTIONALITY

A unique 7-segment fully lit front panel display provides a quick reference system status, giving instant information on activity, states or diagnostics.

CONNECTIVITY

The WILLPOS B20 offers superior connectivity, not only providing full support for legacy peripherals, but uniquely future-proofed for innovative new options.

LESS ENERGY, MORE POWER

The innovative low-energy processor gives top-level POS performance whilst reducing running costs and CO^2 emissions. Tests show the WILLPOS B20 to use 49% less energy than its predecessor, the ST-7000, yet is an incredible 76% more powerful.

RECYCLING PROGRAM

We collect and recycle our used units, re-processing them for re-use.

GREEN MACHINE

We work to strict ecological policies to benefit both the environment and our customers.

- Recyclable chromium-free metal
- Recyclable halogen-free plastic
- Packaged in recyclable paper products
- Built and supported for a long life cycle
- Design and manufacturing on ISO14001
